EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Atty. C. Gagnebin (Reg. No. 25,457) on 3/10/05.

Please replace in the **Specification** on page 5, lines 10 through 19 with the following:

--Depending on the case, for example, the transmitter side requires additional circuit components other than the driver IC 4, such as a resistor 3a for limiting current the light-emitter 3. Similarly, the receiver side may possibly require other circuit components than the photodetector 5 and the amplifier IC 6. When such additional circuit components are required, a recess is determined based on the group of transmitting or receiving, which they belong to. Then, the circuit components are housed in the recess to which the component belong to prevent crosstalk.—

In the **Drawings**, please amend fig 1. to include the reference numeral "3a" as indicated on the attached sheet.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious an optical communication module including a substrate; a transmitter comprising a light-emitter element and a driver IC operative to drive said light-emitter; a receiver comprising a photodetector element and an amplifier IC operative to amplify an output signal from said photodetector; and circuit components accompanied with said said transmitter and receiver; wherein said transmitter, receiver and circuit components are implemented on said substrate, wherein said substrate comprises a ceramic substrate made of laminated green sheets and at least two recesses formed thereon, and said light-emitting element and photodetector element are mounted into said separate recesses and said recesses are separately covered with a mold resin by molding, and wherein depths of said recesses formed are each deeper than a mounted height of said light-emitter or photodetector elements mounted thereinto in combination with the rest of claim 1.

It is noted that the claim 1 is allowable because the unique combination of each and every specific element stated in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
